Firms complying with the criteria as stated above in addition to the manufacture evaluation criteria will be considered favorably for prequalification for that particular product.

Manufacturer Evaluation Criteria for Foreign Manufacturer

For prequalification of Foreign manufacturer, the primary reliance by the evaluation committee in this context would be on the manufacturer’s quality and regulatory certifications, market standing and surveys conducted by credible rating agencies, along with user’s local experience with their products, and an adequate productive capacity where relevant. Details in this respect have already been listed in Section III earlier. In case of manufacturer being non compliant with the criterion, the supplier will not be further considered for pre qualification and the application will be rejected for that particular manufacturer.

Manufacturer Evaluation Criteria for Local Manufacturer

For Local manufacturers, however a minimum of 3-4 years of manufacturing experience of the particular product and besides the desk review as above, an in-depth inspection of the manufacturing facilities will play a very important role in evaluation. The committee will carry out inspection covering evaluation of the facilities, technical design & quality management system to ensure that appropriate health safety and performance standards are met with:

- Documentation processes are in place to support traceability with Design History File (DHF).
- Appropriate Manufacturing and testing equipment is available.
- Human factors usability testing has been carried out for the Product.
